

Control Cables

Overview

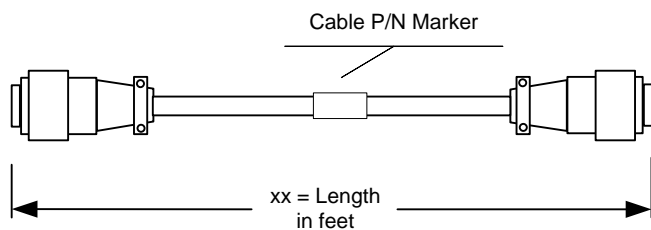

This document highlights the most common control cables needed for PDU remote control.

Of course, if you don't spot a control cable that works for your application, contact AC General. We can provide you the exact cable you need.

Part Numbers:

- P/N 400-012-08
- P/N 400-029

Remote Control Cable, P/N 400-012-08

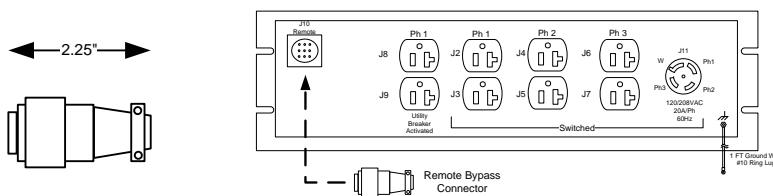

- Standard remote control cable used for most all "R" and "R1" remote controlled PDUs
- 8 ft. jacketed cable is standard length
- Circular plastic connectors are easy to insert/remove

All standard PDUs with remote control are provided with a remote cable, P/N 400-012-08

Longer cables are available by replacing the "XX" with desired cable length

Remote Control Bypass Connector, P/N 400-029

- This pre-wired connector is used to bypass the PDU remote control panel
- Used with any standard PDU configured with a "R1" or "R" remote control option
- Simply plug into the PDU REMOTE connector and then switch use the main PDU breaker to switch all PDU power
- Circular plastic connectors are easy to insert/remove
