Cable Configurations (*)

(*) For simplicity, only 2P/3W configurations are illustrated

Specifications

Power cable

125V Service: Type SJO, 300V rated, 40°C to +90°C
120/208V, 250V, 277/480V, 480V Service: Type SO, 600V rated, 40°C to +90°C

Connectors

All connectors are “locking”, UL Listed, and possess a “grounding” terminal

Labels

Cable ends are labelled “P1”, “P2”. Other labelling is available upon request

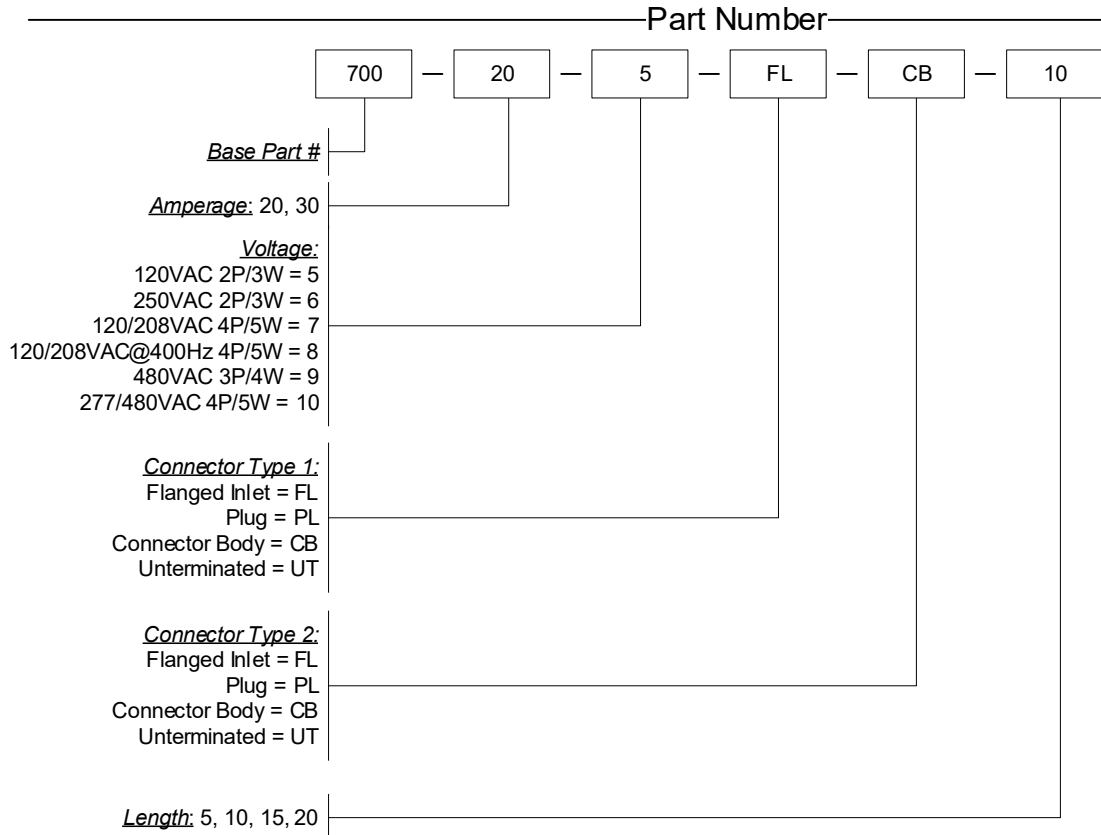

“Unterminated” cables are stripped back 2.5” and have 0.75” exposed wire. Each wire is labelled with phase designation

AC General, Inc.

Ordering Information

To specify a power cable:

- Create a part number by determining your Amperage, Voltage, Connector types on either end, and cable length
- Request a Quote from AC General for the part number(s)

Note: The three phase 4P/5W 400Hz cable is only available in 20A
